Portland Rose
NURSERY

PORTLAND, OREGON

OUR ROSE TEST GARDEN

The above garden won first place in Portland's 1938 annual Rosarian rose garden contest, being adjudged the best commercial garden among the many entries. We are proud of our ability in growing this grand bush and have greatly appreciated the many kinds words of praise from those purchasing our superior stock.

OTHER 1938 PRIZE ROSE WINNERS

MR. CECIL E. HAMILTON, 4535 N. E. 35th Place. First prize for best private garden. Portland's June contest.

MRS. ROBERT WELLS, West Linn, Oregon. Sweepstakes winner at the annual Portland June 1938 Rose Show.

YOU ARE INVITED

To Join Our List of Prize Winners

A free offer to any man, woman or child entering our bushes or cut roses in any organized garden club with a membership of 100 or more persons and judging under the standard rules of the American Rose Society, we offer this free prize. Six selected, first grade roses, taken from our regular list, to the first prize winner.

All that is necessary to do in collection of this prize is to send us a picture (glossy print preferred) of the winning cut rose, bush or rose garden together with good written evidence or certificate from the rose judges and you will be mailed, postage prepaid, the six selected roses. You may make the choice from our regular list or we will gladly lend our help in the selection. Although not necessary, we would like your permission to use the picture and list your name among our prize winners.

VISIT OUR ROSE TEST GARDENS—They contain more than 200 varieties. You will enjoy this as part of your Portland visit and we will be delighted to entertain you. To Portland residents we invite you to come as often as you desire. To watch the progress of these gardens, to ask questions and let us help you in any way we can.

OUR POLICY is to give you the best rose value in the United States. To that end we strive to produce plants of the very highest quality and by careful personal supervision over every order received, ship to you the world's BEST ROSE VALUE.

Through years of experience and very careful study we are convinced our prices are just right. Not too high, not too low. Ideal growing conditions in Oregon gives us a distinct advantage in the cost of production of perfect plants. To this only a very reasonable profit is added to enable us to carry on the production of plants of the highest quality at a minimum low price. Remember, every rose shipped is a two-year field grown No. 1 grade. (American Association of Nurserymen grading standard used.)

WRITE TO US—If for any reason you should feel cause for complaint, we ask that you write to us. Honesty and fairness is the basic principle upon which our success lies, and it is our sincere desire that every person dealing with us shall feel full satisfaction for every dollar spent.

LATE INTRODUCTIONS—PATENT VARIETIES—NOVELTIES

STRONG No. 1, 2-YEAR FIRST GRADE — POST PAID PRICES

The following list contains only the best of the world's new and latest introductions. Many new varieties have been added, all have been thoroughly tested. Descriptions and pictures are as nearly accurate as possible.

PLEASE NOTICE the absence of combination offers in this catalogue. We have looked over many catalogues with different forms of merchandise offered in groups and after careful analysis one will usually find that the price is actually higher per item or not a bargain. It is our aim to offer prices straight from the shoulder in terms that leave no doubt in the buyer's mind. We believe our patrons are just as intelligent as we are and prefer to know as easily and readily as possible, the cost per plant of any particular variety they may wish to choose. Compare our prices with other high grade growers and you will agree that they are really rock bottom. And then remember that **Portland Roses** are the **World's Best**, and that quality in a rose is the most important part of rose gardening.

ANGELS MATEU
Plant Patent No. 174, Conard-Pyle Co.

ALEZANE—Plant Pat. No. 116. A very striking reddish apricot brown with a yellow center. This lovely rose should be among your first choice selections. Very free and consistent bloomer. **Each \$1.25; 3 for \$3.25.**

ALICE HARDING—Plant Pat. No. 202. (Mallerin 1937) A new French rose that made a wonderful fine showing in this district the past season. The bud is large golden yellow, flaked with carmine, opening to a classic formed flower of pure gold. Borne singly on long stems and fading hardly at all. Sweet honey fragrance. Profuse bloomer and very perfect form. **Each \$1.50; 3 for \$3.75.**

AMELIA EARHART—Plant Pat. No. 63. Large cream buds opening to flowers of deep yellow centers shading to cream on the outside with a blush overtone. Fragrant, strong grower and free bloomer. **Each \$1.25; 3 for \$3.25.**

ANGELS MATEU—Plant Pat. No. 174. Another new H. T. Spanish rose by the famous hybridizer Senor Dot. This wide open flower of a brilliant red and orange shading will instantly command your attention. A good bloomer and rich, healthy foliage. Delightfully fragrant. **Each \$1.25; 3 for \$3.15.**

ANNE POULSEN Plant Pat. No. 182. (Floribundi) Another fine addition to the Poulsen family. A brilliant scarlet, almost single, produced constantly throughout the season. The bush is shrubby and compact, making an ideal bedding rose. **Each 75c; \$7.50 per dozen.**

BETTY PRIOR—Pat. rights reserved. (Floribundi) An improved form of the Else Poulsen. Outside petals dark carmine, inside lighter. Borne in large clusters on strong stems, very fragrant. Foliage pale green, tinted purple. **Each \$1.00; \$10.00 per dozen.**

BLACK KNIGHT—Plant Pat. No. 159. Deep velvety crimson, highly perfumed, vigorous with upright habit. A seedling from the Chateau de Clos Vougeot. **Each \$1.00; 3 for \$2.50.**

BRAZIER—(H. T. Mallerin 1936) The beautiful pointed buds of burnt orange open to dazzling, flaming flowers of flame or sunny scarlet, produced by the orange coloring on the reverse of the petals shining through the vivid scarlet inside. These exquisite blooms are produced on vigorous full foliaged plants from June until frost. A lovely rose which lasts well when cut. Certificate of Merit N.R.S. Portland, Ore. **Each \$1.00; 3 for \$2.50.**

CAMEO (Polyantha) Soft pinkish orange. The coloring of this rose is very appealing. The bush is of the usual Polyantha type, producing freely. Plant them in the borders in groups of three or more for the best effect. **Each 75c; 3 for \$2.00.**

CARILLON—Plant Pat. No. 136. (Floribundi) (H. T. Nicolas 1935). A much improved Mme. E. Herriot and of easier culture. To be appreciated it should be planted in groups. The bush is branching and spreading, thus ideal to blanket a bed. The bud is orange-scarlet, long pointed and opens up to a lively coral flame. **Each 85c; 3 for \$2.25.**

CATALONIA—(Dot 1933) The outer petals are of the brightest vermillion red, shading to gold at the base. It is the brightest rose ever produced and will instantly attract attention in any garden. Richly fragrant. 50 petals. **Each 85c; 3 for \$2.25.**

CATHRINE KORDES Large, long pointed buds, opening into flowers of carmine scarlet. Fine form and borne singly on long stems. The bush is a strong grower and produces freely. An excellent rose. **Each 75c; 3 for \$2.00.**

CHIEFTAIN—(H. T. Montgomery Co. 1936) Plant Patent No. 150. A fine red rose that has apparently combined the good qualities of both its parents, Hadley and Talisman. The bud is very long and straight, opening to flowers of very rich red with darker shadings. The bush is vigorous and upright, producing freely throughout the season. **Each \$1.00; 3 for \$2.50.**

(c) 1946

PLANT PATENT
NO. 137

GLOAMING
Plant Patent No. 137.

CRIMSON GLORY

VICTORIA ADELHEID

ROUGE MALLERIN

CHRISTOPHER STONE—(H. T. 1935) This is without doubt the brightest red rose ever produced. The buds are long and pointed, opening to semi-double flowers of vivid scarlet overlaid with velvety crimson, and centers of large showy yellow stamens. The plant is vigorous with good clean bright foliage. **Each \$1.25.**

CONDESSA DE SASTAGO—(Dot 1933) Another new Spanish rose. Like Angels Mateu and Catalonia by the same originator, this rose will command your instant attention. Two toned, coppery-pink inside and gold reverse. Not a bud rose, but a full open, glowing flower, produced in great profusion on a strong healthy bush. Excellent foliage. **Each 75c; 3 for \$2.00.**

CONQUEROR—Saffron yellow flowers with deep tones of orange and copper. Fifteen petals, semi-double, handsome foliage. **Each \$1.00; 3 for \$2.50.**

COUNTESS VANDAL—Plant Pat. No. 38. This beautiful rose has proven itself one of the finest ever created. The long pointed buds, its distinctive shadings of coppery bronze suffused with soft gold and its wonderful form will win your continued praise. **Each \$1.00; 3 for \$2.50.**

CRIMSON GLORY—Plant Pat. No. 105. (Kordes 1935) The name aptly describes this very beautiful rose. A glowing rich crimson, intensely fragrant. The plant is vigorous and free blooming. It is considered by many rose experts to be the best rose of its color ever produced. **Each \$1.00; 3 for \$2.50.**

CYNTHIA—(1933) A sturdy growing bush, producing an improved Charles P. Kilham type flower. Splendid double blooms of rich oriental red. A splendid cut flower and free blooming. **Each 75c; 3 for \$2.00.**

DAILY MAIL SCENTED — (Archer 1927) A highly fragrant rich crimson maroon. The flower is well formed and in this northwest area produces very freely. We consider it an excellent rose. **Each 75c; 3 for \$2.00.**

DAZLA — Brownish-orange changing to orange-scarlet. A semi-single bedding variety of striking brilliance. **Each 75c.**

DONALD PRIOR—(Floribundi) (Prior 1934) (Pat. rights reserved.) The flowers are semi-double, cup shaped of bright scarlet flushed crimson. Fragrant. This is one of the most striking colors of the Floribundi group. **Each \$1.00; 3 for \$2.50.**

DUQUESA DE PENERANDA—(Dot 1931) An excellent upright growing bush with clean bright foliage and producing freely all summer. The flowers are a blending of apricot, orange and pink. Full and double. **Each 75c; 3 for \$2.00.**

ECLIPSE—Plant Pat. No. 172. This beautiful rose has been the favorite yellow with more than ninety per cent of our visitors the past two seasons. The plant is strong and upright with excellent foliage. Beautiful long buds ornamented with attractive sepals. The color is a pure rich golden yellow without shadings. Strong, tough petals that are not too numerous. **Each \$1.25; 3 for \$3.25.**

ETERNAL YOUTH—(H. T. Patent right reserved.) New. Long pointed buds perfectly formed and colored a beautiful soft pink with yellow at the base of each petal. Half open, the flowers retain their high center and rich pink color. The full open flowers are double and expose a large center of deep yellow stamens. Growth is vigorous and has abundant foliage. **Each \$1.50; 3 for \$3.75.**

FAIENCE—H. T. (G. A. VanRossem 1935) Two-tone soft peach and cadmium yellow. Buds of cadmium yellow at the base which shades to shrimp-pink at the edges of the petals, opening to show the inside of the outer petals of a China pink, which deepens toward the center of the flower to shining coppery bronze. **Each \$1.00.**

FEU PERNET DUCHER—Plant Pat. No. 103. (Mallerin 1934) Rich creamy buds opening into full double flowers with yellow and gold centers, marked with occasional pink or white markings on the outside of the petals. A sturdy bush, producing an abundance of rich green foliage. Very free flowering and disease resistant. **Each \$1.00; 3 for \$2.50.**

FLUFFY RUFFLES—(H. T. Poly. 1935). A Floribundi type. Soft silvery pink enhanced by a deep rose tone on the reverse of the petals. A very attractive free blooming rose, strongly polyantha in character. **Each 75c.**

GLOAMING—Plant Pat. No. 137. Large buds carried on long rigid stems make this variety particularly adapted to cutting. A tall, vigorous branching plant. The large full blooms are of a peculiar pink, overlaid with salmon. **Each \$1.00; 3 for \$2.50.**

GLOWING CARMINE—H. T. Large 40 petaled flowers of rich Carmine. Mildly fragrant and freely produced on erect vigorous plants. **Each 75c; 3 for \$2.00.**

GOLDEN MAIN—Plant Pat. No. 254. A pure glistening yellow. Blooms are medium large, with many but small petals, giving the bloom the rounded form of a peony. A strong, vigorous plant that produces freely all season. Its color and foliage is very outstanding. Very successful in this district, attracting much attention the past two seasons. **Each \$1.25; 3 for \$3.25.**

GRENOBLE—(Mallerin 1931) This beautiful new French rose is easily among the best of the red roses. High centered, spicily fragrant, about 45 petaled, scarlet crimson flowers produced on long stems. The plant is vigorous and erect. **Each 75c; 3 for \$2.00.**

JEAN COTE—(Gaujard 1936) (Pat. applied for.) Clear orange-apricot, assuming toward the end an overcast of light carmine. Large flowers full to the center, but of gracefully imbricated form. Flowers come singly on the stems. A medium growing plant that produces steadily throughout the season. Large glossy foliage. A novelty of very high standing. **Each \$1.50; 3 for \$3.75.**

KAREN POULSEN—Floribundi. A 1933 introduction. A very brilliant unfading scarlet. Large, single flowers borne in clusters on strong upright growth. A very showy variety. **Each \$1.00; 3 for \$2.50.**

KATHERINE PECHTOLD—A finely pointed bud of old-gold and orange, opening to a flower of orange and copper. The color of this rose is very striking and beautiful but in some sections it is not too prolific. We consider it a fine rose and well worth growing. **Each 75c; 3 for \$2.00.**

LA PARISIENNE—(H. T.) (Mallerin 1936) The buds are large, long and pointed, deep coral red. Very large open flowers of orange-coral on long stems. Lasting and fragrant. A good sturdy plant with abundant foliage that produces freely all summer. **Each \$1.00; 3 for \$2.0.**

LUIS BRINUS—Plant Pat. No. 102. A beautiful new Spanish rose by Dot. Fine pointed buds of orange-copper opening slowly to a high centered flower of soft old rose flushed with gold. **Each \$1.00; 3 for \$2.50.**

MALAR ROS—(H. T.) (Kordes 1932) An exhibition type rose. Very large, double, high centered, fragrant blood red flowers. The buds are pointed and oval shaped. **Each 75c.**

MARY HART—Plant Pat. No. 8. A striking red sport of the Talisman with the same rich foliage and beautiful form. Deep velvety blood red with an overflow of amber. Unlike most roses, it opens well after being cut and keeps well. **Each \$1.00; 3 for \$2.50.**

© 1932

PLANT PATENT
NO. 8

MARY HART
Plant Patent No. 8

MARCH. OF LINLITHGOW—(1929) An excellent bedding type of rose. The bush is low and branching. The flowers are very shapely with frilled petals. Rich velvety crimson with good fragrance. **Each 75c; 3 for \$2.00.**

MATADOR—Plant Pat. No. 170. Large full, well formed crimson with a dark sheen on the reverse side. Very perfumed and vigorous. This rose does well in this district, producing the best quality dark red rose grown here. **Each \$1.00; 3 for \$2.50.**

McGREDY'S PRIDE — Patent rights reserved. Buds long and pointed. Large full flowers of wonderful brilliancy and borne freely on long stout stems. The flowers are orange and salmon-pink, flushed and veined saffron-yellow. **Each \$1.50; 3 for \$3.75.**

McGREDY'S PINK—Patent rights reserved. Beautiful bright rose. As the flower opens the outer petals shade to a pearly cream and pink with a saffron-yellow base. Blooms continuously from early summer to late autumn. Dark green foliage. **Each \$1.50; 3 for \$3.75.**

McGREDY'S SUNSET—Patent rights reserved. Outside of the petals is a clear butter-cup yellow, tipped orange, while the inside is chrome-yellow flushed with scarlet as it opens. Flowers of pleasing fragrance, borne on strong upright stems. Very sun resistant. **Each \$1.50; 3 for \$3.75.**

McGREDY'S TRIUMPH—Plant Pat. No. 190. Large pointed buds of cerise over-shadowed with orange, opening slowly into large cup-formed flowers of brilliant pink and cerise overlaid with amber toning to yellow and large tufts of yellow stamens. Very handsome foliage. **Each \$1.25; 3 for \$3.25.**

McGREDY'S WONDER—Another beautiful creation of McGredy's noted for good form. Fine buds opening to a delightful shade of orange-yellow. **Each 75c; 3 for \$2.00.**

McGREDY'S YELLOW—Cup-formed flowers of unfading yellow. About 25 petals. Dark green, holly-like foliage with red stems. Vigorous growth and free blooming. **Each 75c; 3 for \$2.00.**

MISS AMERICA—Plant Pat. No. 264. (Nicolas 1938) Here is a brand new rose we believe you will like. A lovely color of flesh with salmon and gold suffusion, faint gold at the base and frequently with a salmon center. Flowers average 65 petals and are produced singly on long stems all through the season. Fragrant and a persistent bloomer. **Each \$1.00; 3 for \$2.50.**

MME. COCHET-COCHET—(1934) Plant Pat. No. 129. Perfect formed buds opening to flowers of soft salmon rose. The tips of the petals are tipped with silver and shading to gold at the base. **Each \$1.00; 3 for \$2.50.**

MME. JEAN GAUJARD—Patent rights reserved. A vigorous growing, upright two-toned rose. Bud long and graceful. Full open flowers are cup-shaped, light carmine-buff on outside of petals and yellow-buff on inside. **Each \$1.50; 3 for \$3.75.**

MME. JOSEPH PERRAUD — (H. T. 1934) Bagatelle Gold Medal Winner. Long slender pointed buds of nasturtium-buff tipped a shell at the petal edges. Beautiful glossy foliage with red stems. **Each \$1.00; 3 for \$2.50.**

SATURNIA
Patent Rights Reserved

MME. NICOLAS AUSSEL — (H. T. 1930) Very similar to Mme. Eduoard Herriot greatly improved. It is of the finest form and the coloring greatly intensified. We highly recommend this beautiful rose. **Each 75c; 3 for \$2.00.**

MRS. FRANCIS KING—Plant Pat. No. 253. Very large full rose, first tinted cream and ivory and eventually turning to white. **Each \$1.00; 3 for \$2.50.**

NIGRETTE—Plant Pat. No. 87. "The Black Rose of Sangerhausen." Intensely crimson with a blackish sheen. Deliciously fragrant. A very unusual rose. **Each \$1.00; 3 for \$2.50.**

PERMANENT WAVE—(Floribundi) Plant Pat. No. 107. The petals are fluted, or waved, permanently from the bud stage to the finish. Blooms rather large for the type, in great clusters. Rosy pink with cerise edges. Handsome plants; may be grown tall enough for a low hedge. **Each 75c; \$7.50 per dozen.**

PHYLLUS GOLD—H. T. Robinson 1935) A strong upright growing rose of great productiveness. Nicely shaped buds of yellow with tints of red. The flowers are large, fragrant, high centered, deep golden yellow. The petals are of great substance and hold their color well. **Each \$1.00; 3 for \$2.50.**

PICTURE—A rose of medium size but exquisite form. Every bloom is a picture. Color is a rich pink with a salmon undertone. Clean healthy foliage. **Each \$1.00; 3 for \$2.50.**

PINK DAWN—(1935) Fine buds opening to a deep rose-pink with an orange base. Sweetly fragrant. Excellent for cutting. **Each 75c; 3 for \$2.00.**

PORTADOWN FRAGRANCE—A very double flower of orange-salmon and pink with a silver sheen. Deliciously fragrant. The bush is low and branching with fine foliage. Prolific bloomer. **Each 75c; 3 for \$2.00.**

PRESIDENT PLUMCOCQ—Coppery yellow buds opening to large, double, brilliant apricot flowers. The plants are vigorous and always in bloom. **Each 75c; 3 for \$2.00.**

QUEENSLAND BEAUTY—New Australian sport of the well known Golden Dawn, with the same immense foliage. The flower is a large coppery pink. **Each \$1.00; 3 for \$2.50.**

REX ANDERSON—(Pat. rights reserved.) White with an overcast of ivory, slightly deeper in the center. The large blooms are carried, several together, on strong stems and may be grown to enormous size by disbudding. Pleasant perfume. The growth is exceptionally free and vigorous and the abundant grey foliage sets the flowers to perfection. **Each \$1.50.**

ROCHEFORT—Plant Pat. No. 191. (Mallerin 1935) A large full and globular bud followed by a very double flower. An almost indescribable color combination of copper, orange and pink. The bush is compact and of good blooming habit. **Each \$1.25; 3 for \$3.25.**

ROME GLORY—(Aicardi 1937) A cross of Dame E. Helen and Sensation. Long stems of large crimson red buds, opening to full well formed, fragrant cerise red blooms. Long lasting flowers. Not affected by dry or wet weather. **Each \$1.50; 3 for \$3.75.**

R. M. S. QUEEN MARY—Plant Pat. No. 249. Blooms of a glorious combination of vivid shades, blending rich glowing salmon with an exquisite pure pink and with an orange base. Freely produced on strong vigorous plants. Delicately perfumed. **Each \$1.50; 3 for \$3.75.**

RONSARD—(Pat. Applied for.) Buds of yellow, gradually edges of petals curl back and show deep scarlet-red inside. Blooms of medium size and produced in quantities throughout the season. **Each \$1.50; 3 for \$3.75.**

ROSE STERLING—Plant Pat. No. 21. A cross of an unnamed seedling and Madam Butterfly. It is striking pink in color like Killarney Brilliant, increasing its attractiveness with a yellow base. Long pointed buds opening to a well formed flower. A strong upright grower with a deep green foliage. A free bloomer with a rapid succession of flowers. Its beautiful form will instantly win your admiration. **Each \$1.25; 3 for \$3.25.**

ROUGE MALLERIN—(H. T. 1934) This new French rose is truly a fine addition to the red varieties. The well formed buds open to a full brilliant red with darker shadings. Tips of petals curling back to produce a very striking effect. Excellent coppery-bronze foliage. **Each 75c; 3 for \$2.00.**

SATURNIA—(Aicardi 1933) (Pat. rights reserved.) It is similar to Signora with its coloring more intensified. The flowers are a brilliant cardinal red, reverse salmon-yellow and copper. The bush is upright and strong and produces freely. Although it is too new to know all about it, we consider it a most beautiful rose and highly recommend it for at least the Pacific Coast district. **Each \$1.00; 3 for \$2.50.**

SIGNET—Plant Pat. No. 199. A cross of Premier and Talisman. A long pointed bud of deep pink, opening to a softer single toned bright pink. The flowers are large with about thirty petals, decidedly fragrant, long stemmed. The plant is vigorous, free blooming and disease resistant. An exceptionally fine cutting rose that holds well and opens freely. **Each \$1.00; 3 for \$2.50.**

SIGNORA—Plant Pat. No. 201. Long buds of a warm burnt sienna, opening to a lighter hue toward mandarin. Tall growing with every bloom on a long stem. Excellent for cutting. Beautiful foliage. **Each \$1.25; 3 for \$3.25.**

SENORA GARI—(Dot 1934) Long pointed buds of deep orange, opening to large double flowers of the same color, changing to buff apricot. The plant has a strong branching growth. Fragrant. **Each \$1.00; 3 for \$2.50.**

SMILES—(Nicolas 1937) (Floribundi) (Pat. rights reserved.) Brilliant salmon-pink flowers, semi-double, 3 inches across in great masses all the time, and of great duration in all weather. The plants are medium growth, branching and with handsome foliage. **Each 85c; \$8.50 per dozen.**

SNOWBANK—Plant Pat. No. 279. (Floribundi) Large flowering, low growing polyantha. The buds are buff-orange, opening to semi-single, bluish white flowers and turning to pure white. **Each 85c; \$8.50 per dozen.**

SOUTHPORT—(H. T. 1933) A brilliant unshaded scarlet rose of about 18 petals and a delightful tea scent. A very brilliant rose to be recommended for striking effects. **Each 75c; 3 for \$2.00.**

SOUV. DE JEAN SOUPERT—A medium growing plant. The buds are long and tapering, deep golden yellow, opening to sweetly scented flowers, large semi-double, cream colored and of heavy texture. **Each 75c; 3 for \$2.00.**

SOUV. DE MME. CHAMBARD—Large semi-double, cupped, fragrant. The outer petals are a rich rose red; inner petals a deep rose pink with a golden glow at the center. Vigorous, upright growth. **Each 75c; 3 for \$2.00.**

TEAXS CENTENNIAL—Plant Pat. No. 162. A sport of the President Hoover with all its fine qualities. Blooms of blood red, turning to cerise red in the center. The color is very striking. The bush is very upright and strong growing. **Each 75c; 3 for \$2.00.**

VICTORIA ADELHEID—A very striking color combination. The buds are well formed, opening to flowers of a rich rose-pink on the inside and deep yellow on the outside. Petals are sometimes edged with red. **Each 75c; 3 for \$2.00.**

VICTORIA HARRINGTON—Pointed buds opening to a high centered blackish red., flushed golden at the base. Intense, spicy fragrance. Instead of fading with age, the golden lustre increases, producing a delightful brownish red effect. A rose that is different from any other rose. **Each 75c; 3 for \$2.00.**

VISCOUNTESS CHARLEMONT—(Pat. rights reserved.) (Floribundi) The buds are a salmon-rose, shading off into a satiny rose-pink as the blooms develop. Deep buttercup-yellow at the base of the petals. Very fragrant. Foliage is dark cedar green, with reddish brown thorns on long strong stems. **Each \$1.00; 3 for \$2.50.**

WHITE BRIARCLIFF—(Lens 1933) Plant Pat. No. 108. Vigorous bushy plants producing very heavily. It is a supreme white rose of the finest form. **Each \$1.00; 3 for \$2.50.**

YOSEMITE—Plant Pat. No. 109. Buds of orange-scarlet in clusters opening to flowers of orange-scarlet suffused carmine on the reverse side. The plant is of vigorous bushy habit and in continual bloom throughout the summer. It is especially beautiful in the spring. **Each \$1.00; 3 for \$2.50.**

BUDDED ROSES

All of the roses offered in this catalogue are two year first grade field grown plants, budded on Multiflora root stock, except a few of the patent varieties which are supplied to us directly from the patent owners and in some cases other root stocks are used. It is conceded by all rose authorities, that Multiflora is the best and most universal of any root stock known.

FACTS , DO YOU KNOW:

Oregon plants are most free of disease.

Oregon climate is best suited and produces a superior grade of roses and ornamental plants.

That it pays to buy from a large nursery that is able to bear the responsibility of handling as perishable a commodity as plants.

That the Portland Rose Nursery is large and responsible and produces plants comparable only to the world's best.

That it costs less to care for good plants than it does for inferior plants.

General list—Containing the most popular tried and tested varieties known

POSTAGE PREPAID PRICES

Within U. S. or its possessions

West of the Rocky Mountains—Each 60c; 3 for \$1.50; 12 for \$5.00
East of the Rocky Mountains—Each 70c; 3 for \$1.80; 12 for \$6.00

AMERICAN BEAUTY—An old time favorite red. Though still popular in some sections of the United States, we do not find it satisfactory for the Pacific Coast sections.

AMI QUINARD—(H. T. 1927) Long pointed, blackish garnet bud, opening into a loose, semi-double, fragrant bloom; so dark it seems almost black. A very vigorous bush with fine foliage. A persistent bloomer.

ANGELE PERNET — Buds deep, flaming orange to semi-double blooms of brilliant reddish apricot. Fragrant. Bush of moderate growth, stems stiff, foliage shiny and attractive.

AUTUMN—Mingled shades of burnt orange and red. Somewhat like the President Hoover but smaller, darker and more double.

BETTY UPRICHARD—Buds coppery red. Flowers semi-double; salmon pink on inner surface of petals and glowing orange carmine on outside. Plant tall and erect, and flowers borne on long stems.

BRIARCLIFFE—An improved Columbia. High-centered buds of excellent form, color bright pink. Stems long, stiff and nearly thornless.

CALEDONIA—(1928) Large, double, high centered, pure white. The bush is sturdy and of upright growth.

CECIL—Very large, single flowers of clear, golden yellow. Resistant to mildew and almost constantly in bloom.

CHAS. K. DOUGLAS—Large, semi-double flowers of brilliant light crimson with a scarlet undertone.

SOUTHPORT (See Page 7)

STANDARD VARIETIES d's Best

CUBA—Brilliant orange-scarlet buds of great length which open to large, almost single flowers of vermillion and orange.

DAINTY BESS—Slender, rosy-salmon buds opening to pale rose blooms. Prolific bloomer, lasting when cut and charming for display in individual vases.

DAME EDITH HELEN—Pointed buds which open slowly to large blooms of brilliant pink. Very fragrant.

DUCHESS OF ATHOL—Large buds of bronzy orange; flowers of apricot and gold flushed with rose and borne in profusion. Foliage dark bronzy green and remarkably mildew-proof.

DUCHESS OF WELLINGTON—Long saffron yellow buds, opening to very large, light yellow flowers.

EDEL—Pure white on outside of petals and ivory at base. Very full and double, with frost-like edges.

EDITH NELLIE PERKINS—Salmon-pink and cerise-orange. Buds long and pointed.

EDITOR McFARLAND—Long pointed pink bud with a glow of amber and a paler edge. Belongs to the Radiance group.

E. G. HILL—(1929) A large dazzling red, produced singly on strong stems. A sixty petaled rose that has won a splendid name and is everywhere admired.

ETOILE DE HOLLAND—(1919) Large crimson flowers, with a velvety sheen. About 35 petals. The plant is strong and branching, producing an abundance of fine flowers throughout the season. One of the very best of the red roses.

FRAU K. DRUSCHKI—Pure white, outer petals of buds occasionally tinged with pink.

FEU JOSEPH LOOYMANS—(1921) Long, beautifully formed buds of apricot, opening to a golden buff. A good bloomer that deserves a place among the best.

SUSAN LOUISE

PRESIDENT H. HOOVER

LUIS BRINUS

RAPTURE

GENERAL McARTHUR—Bright red with flat open blooms, sweetly scented.

GOLDEN DAWN—Buds of rich straw yellow, opening to a beautiful well formed, fragrant, double sunflower yellow, passing to lemon with age.

GOLDEN EMBLEM—Beautiful long buds of brilliant yellow striped with crimson on the outer petals. The blooms open slowly and are dark golden yellow.

GOLDEN OPHELIA—Deep golden yellow, flowers of exceptionally fine form. Strong clean foliage and a fine cutting rose.

GOLDEN RAPTURE—(1933) Beautifully formed buds opening to fully double flowers of rich yellow. Long strong stems supported by a sturdy vigorous bush.

DAME EDITH HELEN

GRUSS AU TEPLITZ—The old bedding rose. Always in bloom with its display of rich crimson.

HINRICH GAEDE—The most spectacular rose in the garden. Long pointed buds of nasturtium red opening into a large, double flower of orange-yellow, flushed with red. Vigorous free-flowering plants.

HEINRICH WENDLAND—A beautiful combination of golden-yellow and vivid nasturtium-red on opposite surfaces of the petals. Fragrant, unfading, 100 petals. You will like this new rose.

HOOSIER BEAUTY—Long dark red buds opening to velvety red. Spicy fragrance.

HORTULANUS BUDDE—Bright scarlet semi-double flowers. Fragrant and a heavy producer.

IMPERIAL POTENTATE—(1923) Large, about 55 petals, perfectly formed flowers of shiny rose pink. Exceptionally fine foliage. Strong growing bush that will succeed most everywhere.

INDEPENDENCE DAY—A sturdy bush that is always in bloom. Loose flowers of orange-apricot and flame color. A very different type of rose that immediately attracts attention. An English gold medal winner.

TAKE ADVANTAGE AND SAVE

Each season we find certain rose varieties selling out ahead of other kinds, in spite of our careful plans to anticipate the demand. Many buyers select roses because of the name or for other reasons without regard to the real merit of the variety. If you are not familiar with the individual varieties and just want a good collection that will be colorful and harmonious in your garden, this is your opportunity to save by allowing us to choose for you. You name the color only. We guarantee to send only good approved varieties and use our best judgment for harmony. Each plant correctly labeled its proper name.

You may select colors of

Red, Pink, Yellow, Copper or White

Varieties will be selected from our general list. Will not contain patent varieties or latest introductions in our list.

JOANNA HILL

MEV. G. A. VanROSSEM

CHAS. P. KILHAM

INNOCENCE—Great stiff petaled flowers 4 to 6 inches across, long ivory buds. Single white, unlike any other rose. Rich, spicy fragrance.

IRISH ELEGANCE—Long, beautiful buds of apricot, opening into a single flower.

IRISH FIREFLAME—Rich deep orange, splashed with crimson. Single flower.

IRISH HOPE—A fully double deep red rose with a delightful fragrance. A new rose that has attracted more than its share of comment the past season. A very free bloomer, a short compact and upright bush.

ISOBEL—Flowers single and of a rich, flushed orange-scarlet, changing to brilliant pink and copper with pure yellow centers.

JOANNA HILL — A slender daintily colored variety of orange yellow. Moderately fragrant and exceptionally fine for cutting.

JULIEN POTIN—Gorgeous brilliant golden-yellow becoming deeper as the flower matures. Buds long and shapely. Glossy, bronzy-green, mildew-proof foliage.

K. A. VICTORIA—Perfectly formed creamy buds opening to pure white flowers. An old rose introduced in 1891 and is still considered one of the best of the white roses. Fragrant, free blooming and of medium upright growth.

K. OF K.—Brilliant scarlet with a velvety sheen. Semi-double, intensely fragrant and wonderful for cutting.

LADY FORTEVIOT—Large buds opening to very large bright saffron yellow flowers flushed with carmine, red and orange.

LADY HILLINGTON—Beautiful long pointed buds opening into rich apricot-yellow blooms. Foliage when young, dark violet, turning to deep green with age.

LADY MARGARET STEWART—Buds of deep sunflower yellow, heavily veined with orange-scarlet which open into a flower of deep sunflower-yellow. Leathery sage green foliage which seems to be disease proof.

LEONARD BARON—Very large fully double flowers with about 100 petals. A blending of shell pink, copper and salmon. The flowers are immense size supported by a large sturdy bush. A very striking garden effect and a good cutting rose when fully open.

LORD CHARLEMONT—Long buds opening to large double flowers of intense clear crimson-scarlet and deepening to lasting carmine-crimson with almost-black shadings.

LOS ANGELES—A brilliant salmon-pink of 27 petals. The plants are strong and branching. In this section they produce freely throughout the season and are still very popular.

LUCIE MARIE—A very strong growing plant, producing an abundance of bloom. A soft apricot yellow lightly suffused with coppery red.

LULU—This beautiful rose has created the most favorable comment wherever grown. Extremely long dainty buds of coral apricot opening to semi-double flowers. The prettiest button hole rose on the market. The bush is strong growing and free flowering.

MARGARET McGREDY — Orange scarlet or brick red. Heavy, beautiful foliage and stout stems.

MAX KRAUSE—This rose is due for long popularity. The beautiful vigorous bush, healthy dark green shiny foliage and its prolific blooming qualities will alone insure this. The fine buds open to a full, mildly scented flower of golden-yellow.

MAYOR BAKER—Very little known is this beautiful rose, named in honor of Ex-mayor Baker of Portland. A coppery red resembling Cuba in form. We consider it one of the most beautiful roses in our gardens.

McGREDY'S SCARLET—Brilliant red petals on hinges of deep gold. An exceptionally fine rose, seldom out of bloom.

MEV. G. A. VanROSSEM—Thick petaled, large orange-yellow flowers, heavily veined and suffused with red. A strong handsome bush that blooms very freely throughout the summer.

MME. BUTTERFLY—Perfectly formed flowers of about thirty petals. Light pink faintly tinted with gold. A really excellent rose of the Ophelia type that will do well in almost any garden.

MME. CAROLINE TESTOUT—Clear pink, flowers large and showy.

MME. EDOUARD HERRIOT—A pure copper color, with buds of coral red, shaded with yellow at the base.

MME. JULES BOUCHE—An old rose introduced in 1911. Perfectly formed flowers of pure white with a slight tint of pink in the center when flower first opens. 34 petals. Strong healthy bush.

MRS. AARON WARD—Indian yellow, washed salmon rose; buds small but beautifully formed and borne profusely; vigorous growth.

MRS. E. P. THOM—Has well formed buds and fairly large, double flowers of clear, even yellow, produced on good stems.

MRS. HENRY MORSE—A bright pink with silvery shadings.

MRS. PIERRE S. DUPONT—Beautifully formed, dark orange yellow. The buds are rather small but a most profuse bloomer. Dark glossy green mildew-free foliage.

MRS. SAM McGREDY—Large fairly double bloom of orange-salmon with a suffusion of gold. Strong healthy grower.

OLD GOLD—Coppery red; a very fine and popular rose.

OPHELIA—Flesh pink, shaded with rose. Large beautifully formed buds standing up well on stiff stems.

OSWALD SEIPER—Pale cream buds of fine form which open to fully double creamy white flowers with tea fragrance.

PADRE—Rich coppery scarlet. Semi-double flowers borne on long erect stems on a tall bush. Free bloomer and a remarkable color

TALISMAN

PORTADOWN IVORY—Long buds opening to ivory white. Perfectly double flowers, sweetly scented.

PRESIDENT HOOVER—Combines many shades of cerise-pink, flame, scarlet, and yellow. Long, beautifully formed buds and a rich fragrance. Bush is exceptionally fine.

RAPTURE—Like Ophelia in form, but a deeper pink.

REV. PAGE ROBERTS—Soft buff yellow to a rich salmon. Very free blooming low bush. Rich, fruity fragrance.

ROSLYN—Large double, deep golden yellow. Free flowering and a good bush.

SISTER THERESE—(1930) In the front rank of the yellow roses. Large, long buds of golden yellow opening to semi-double, cupped flowers of cadmium yellow with edge of petals streaked with carmine.

SHOT SILK—Gold and orange buds opening to semi-double flowers of coppery rose shot with golden yellow. Bright foliage almost immune to mildew. Good for cool places.

SOUV. DE CLAUDIUS PERNET—Long-pointed buds of sunflower-yellow carried on good stiff stems. Exceptionally good.

SUNKIST—(1932) An improved sport of Joanna Hill. Coppery orange. Double blooms on long straight stems. Long lasting.

SUSAN LOUISE—Unusually long slender buds, opening to full blooms of dainty pink. An offspring of Belle of Portugal.

TALISMAN—A mixture of orange and yellow which varies in the different blooms. Fairly double and borne on long stems. Sweetly scented.

VATERLAND—A strong growing rose which is much larger and of a darker colors than the Hadley. Flowers very double.

VESUVIUS—Shapely buds, opening to dark red single blooms with showy yellow stamens; exquisitely fragrant.

VILLA DE PARIS—An excellent deep yellow. Fine for cutting purposes.

CLIMBING ROSES

Popularity is steadily increasing with this class. They are hardy and prolific. Every home, no matter how small will find a place for one or more.

Plant in a good sunny location. If the soil is poor, well rotted cow manure should be added to loosen up and enrich it. Do not use green manures or commercial fertilizer when planting. After plants are growing well and established, about May or June, small feedings of a good balanced commercial fertilizer will be found beneficial.

PREPAID PRICES

No. 1 Grade, Two Year, Budded Plants
Price except as otherwise noted

West of Rocky Mountains—Each 60c; 3 for \$1.50; 12 for \$5.00

East of Rocky Mountains—Each 70c; 3 for \$1.75; 12 for \$6.00

(*) Hybrid everblooming.

AMERICAN BEAUTY—Rich, rosy, deep pink flowers, about three inches in size, which are produced in great abundance.

AMERICAN PILLAR—Single pink with white center and yellow stamens. Flowers borne in cluster with foliage a clean and shiny green.

***BLAZE**—Plant Pat. No. 10. A hardy everblooming climber similar to Paul's Scarlet except for its everblooming feature. Each \$1.00; 3 for \$2.50.

***BLACK BOY**—Semi-double flowers of dark glowing red, overlaid with a sheen of velvety black. Each 75c; 3 for \$2.00.

***BELLE OF PORTUGAL**—Long bud, soft creamy pink flowers, with a suggestion of yellow. Vigorous grower. Somewhat tender. Each 75c; 3 for \$2.00.

***CECIL BRUNNER**—Vigorous, pale pink, baby climber.

***COUNTESS OF STRADBROKE**—A new climber from Australia becoming very popular and doing well in this country. Immense flowers of the richest red with almost black shades. Fragrant, thirty to forty petals. Each \$1.00; 3 for \$2.50.

***COUNTESS VANDAL**—Clb., Pat. No. 38. This new addition to the climbing roses we are very pleased to offer. It is exceptionally beautiful with its long pointed buds and distinctive shading of coppery bronze suffused with soft gold. The many friends of this rose in the bush form will be delighted to find this fine variety now available in the climbing form. Each \$1.00; 3 for \$2.50.

***DAME EDITH HELEN**—Large, very double shell pink.

***DAINTY BESS CLIMBER**—Very new is the climbing form of this beautiful single variety. Petals of pale pink opening wide to display a contrasting center of tall red stamens. Everblooming. Each \$1.00; 3 for \$2.75.

DOROTHY PERKINS—Clusters of bright pink flowers.

***DR. VAN FLEET**—A soft delicate flesh pink borne singly on long stems. One of the very best of its type. Strong, hardy, growing plants that bloom recurrently on the Pacific Coast but making only a June showing east of the Rocky Mountains.

DOUBLOONS—Plant Pat. No. 152. (H. S. 1934) Undoubtedly the best yellow climber to date. Clusters of large, cup-formed, saffron-yellow flowers, opening successively, thus prolonging the blooms. Sturdy straight canes, bright glossy-green foliage. Each \$1.50; \$15.00 per dozen.

***EDITH NELLIE PERKINS**—The same fine form as in the bush rose. Long and pointed buds opening to beautiful flowers of salmon-pink and cerise orange.

EMILY GREY—A rambling growth, producing an abundance of beautiful yellow buds opening to a clear ecru double flower. Fragrant.

***ETOILE DE HOLLAND**—A climbing sport of one of the best dark red bush rose. Each 85c.

***GENERAL McARTHUR**—Fine, fragrant red.

***GOLDEN EMBLEM**—Yellow, same colorings as in the bush rose.

GOLDEN CLIMBER—Plant Pat. No. 38. A golden yellow flecked with orange scarlet coming on stems of 18 inches or more. Hardy and vigorous growing but not a profuse bloomer. Each \$1.00; 3 for \$2.50.

GOLDEN GLOW—Plant Pat. No. 263. A beautiful new climber by Brownell has pure ecru yellow, hybrid tea-like flowers, 3½ to 5 inches in diameter. Hardy and vigorous up to 15 feet or more. Healthy lustrous foliage. Each \$1.00; 3 for \$2.50.

***HADLEY**—Fragrant, rich crimson flowers. Rich, reddish green foliage.

JACOTTE—Large, semi-double flowers of coppery yellow, tinted red. A Wichuraina rose of great beauty that may be used for trailing over banks with striking effects. Each 85c.

Caution—Unpack plants immediately upon arrival and place in container of water over night. Not longer. Plant out immediately if possible. If planting is done in the fall the plants may be left with their tops untrimmed until spring at which time they should be cut back to not more than six or eight inches above the ground. Do not use any fertilizer at time of planting. See planting instructions.

***JOANNA HILL**—(1936) A new sport of the very popular bush form. Although it is too new to tell just how good this climber will be, we believe it well worth while and trial. The flowers are faintly colored orange and yellow. A fragrant and fine cutting rose. **Each \$1.00; 3 for \$2.50.**

***K. A. VICTORIA**—A beautiful creamy white.

KITTY KININMONTH—Large ruffled semi-double blooms of fadeless pink. An Australian rose of vigorous climbing growth. Its June display of flowers is matchless and declared by many as the most beautiful pink rose of all climbers. **Each 75c; 3 for \$2.00.**

***LADY ASHTOWN**—Bright silvery pink.

***LADY HILLINGTON**—Large flowers with long-pointed buds. Color of deep apricot-yellow.

***LOS ANGELES**—Shrimp pink. Same as the bush form.

***LORD CHARLEMONT**—Another new addition to the climbers. Long buds opening to large double-flowers of intense clear crimson-scarlet. You admired this in the bush form. You will be equally pleased with the climbing form. **Each \$1.00; 3 for \$2.50.**

***MARECHAL NIEL**—A fragrant large yellow rose of particular effectiveness where hardy. In the Portland area it should be planted in sheltered location. Colder climates should not consider planting. **Each 75c; 3 for \$2.00.**

***MERMAID**—Climbing, beautiful single pale yellow flowers, 5 to 6 inches across. Without doubt the prettiest yellow climber of all. Not as rugged and hardy as some and we only recommend this for the sunny sheltered location. **Each \$1.00; 3 for \$2.50.**

***MME. E. HERRIOT**—Brilliant coral red buds opening to flaming pink and orange.

MME. GREGOIRE STAECHELIN—Crimson buds opening to large, perfumed pale pink flowers.

***MRS. AARON WARD**—Yellow, tinted salmon rose.

***MRS. ERSKINE PEMBROKE THOM**—A pure unfading yellow of fine form. Good strong canes and fine foliage. An excellent bloomer throughout the summer. **Each \$1.00.**

MAID OF GOLD — Plant Pat. No. 246. Buds of golden yellow splashed with red. Opens to large golden-yellow double flowers. **Each \$1.00; 3 for \$2.50.**

***MARY HART**—Plant Pat. No. 8. A striking red sport of Talisman with the same rich foliage and beautiful form. Deep velvety blood-red with an overflow of amber. Unlike most roses, it opens well after being cut and keeps well. **Each \$1.50.**

MARY WALLACE—Early blooming. Long buds which open into large flowers of a brilliant warm pink color. When season permits, this rose repeats sparingly in the fall.

***NEW DAWN** — Plant Pat. No. 1. (Everblooming Dr. VanFleet.) Dainty pale pink fragrant blooms are borne from early June until hard frost on long stems. **Each \$1.50; 3 for \$3.75.**

PAUL'S SCARLET—Without doubt the most popular red climber grown. It is very prolific and blooms for a long period in June. Growth is strong and vigorous.

PRINCESS VON ORANGE—Plant Pat. No. 106. A dazzling color in climbing roses. Branches literally covered with masses of brilliant orange-scarlet flowers imparting an unusually radiant glow. A vigorous grower and exceptionally hardy. Occasionally repeats in the fall. **Each \$1.00; \$10.00 per dozen.**

E. G. HILL

***PRESIDENT HERBERT HOOVER**—Same flower as the bush form.

***REVEIL DIJONNAIS**—A new hybrid tea French climber of great beauty. Coppery red buds opening to a nearly single flower. Outside of petals are coppery red with yellow centers. A very striking novelty rose. Not a strong climber and not a profuse bloomer, but one of the most beautiful roses of recent introductions. **Each \$1.00; 3 for \$2.75.**

***SHOT SILK**—Gold and orange buds opening to semi-double flowers of coppery rose.

***SUNBURST**—Yellow, shaded to orange.

***TALISMAN**—New. Same as the bush form. Mixture of orange and yellow which varies in the different blooms.

DAINTY BESS

FLORIBUNDI ROSES

This is a new classification of roses. By it we refer to the large flowering types of Polyantha or baby roses. A separate listing is not made of these, but they will be found designated through our main listings. Great progress, during the last few years, has been accomplished with this class of roses. They now range through all shades of color and all styles of bloom similar to our hybrid teas. They bloom steadily throughout the season without interruption, making them suitable for many types of border and mass plantings. Architects and landscape men are delighted with them. The demand is increasing everywhere. Try them in your garden. They are the hardiest, most prolific and easiest to use of all roses.

POLYANTHA OR "BABY" ROSES

The hardiest, most prolific, requiring the least care of all roses. Plant them in groups throughout the garden. They are suitable for low hedges, borders, or for mass planting. They flower continually from spring until fall.

Postpaid prices—No. 1, first grade roses. The world's best
(Within the United States)

West of Rocky Mountains—**Each 60c; 3 for \$1.50; 12 for \$5.00**

East of Rocky Mountains—**Each 70c; 3 for \$1.80; 12 for \$6.00**

New varieties are listed in regular order. For description and prices see the late introductions.

ANNE POULSEN—Floribundi. See late introductions.

BETTY PRIOR—Floribundi. See late introductions.

CAMEO—See late introductions.

CECIL BRUNNER—Best known and the most popular of the old type pink baby rose. Large loose clusters of pink flowers all summer. The perfect button hole rose.

DONALD PRIOR—Floribundi. See late introductions.

ELLEN POULSEN—Medium size, fairly double flowers of bright rose pink.

ELSE POULSEN—Strong growing plants, with large, single, bright rose pink flowers.

FLUFFY RUFFLES—Floribundi. See late introductions.

GLORIA MUNDI—Glowing scarlet orange. Large, fully double flowers borne in clusters.

GOLDEN SALMON—Clusters of brilliant orange scarlet.

IDEAL—Dark scarlet blooms, shaded with black. Blooms profusely in immense clusters.

IMPROVED LAFAYETTE—Floribundi. This new 1935 rose surely deserves a place in every home planting. Large glowing red, suffused crimson. The flowers are borne on strong, upright canes in beautiful loose cluster. The foliage is dark green and shiny. A constant bloomer throughout the summer.

KAREN POULSEN—(Floribundi) See late introductions.

KIRSTEN POULSEN—Floribundi. Grows three to four feet tall. Covered with medium size, cherry red, single flowers all summer. An excellent hedge variety.

MISS EDITH CAVELL—Small, semi-double flowers of scarlet red with darker shadings.

NYPOLS PERFECTION—Floribundi. A beautiful deep rose pink. Rather open sixteen petaled flowers. Dense glossy foliage. Continuous bloomer.

PERLE DE ORR—Similar to the Cecil Brunner but with coppery shade.

PERMANENT WAVE—Floribundi. See late introductions.

SMILES—Floribundi. See late introductions.

SNOWBANK—Floribundi. See late introductions.

SUNSHINE—Medium size blooms in clusters. Orange turning to coral with orange overcast. Bush is compact.

VISCOUNTESS CHARLEMONT—Floribundi. See late introductions.

Caution—Unpack plants immediately upon arrival and place in container of water over night. Not longer. Plant out immediately if possible. If planting is done in the fall the plants may be left with their tops untrimmed until spring at which time they should be cut back to not more than six or eight inches above the ground. Do not use any fertilizer at time of planting. See planting instructions.

ANNE POULSEN
Plant Patent No. 182

SPECIE ROSES

Plan a place in your garden for some of these old-fashioned varieties. You will enjoy them. They are not satisfactory to plant in the beds with the hybrid teas, but placed in corners or along lattice fences or against a building and permitted to grow without pruning back, they make a beautiful display and all are extremely hardy.

POSTAGE PREPAID PRICES

AUSTRIAN COPPER—Single flowers of coppery red on the inside and bright yellow on the outside. Strong thorny growth. **Each 75c; 3 for \$2.00.**

HARRISON'S YELLOW—Sweetly scented, bright yellow flowers in great profusion in the spring. Tall rambling growth. **Each 75c; 3 for \$2.00.**

MAX GRAF—A fine ground cover rose. Vigorous handsome foliage, producing sprays of large, single, bright pink flowers. **Each 75c; 3 for \$2.00.**

F. J. GROOTENDORST—Pink. A tall growing shrub type rose. The flowers very much resemble a pink carnation borne loosely in clusters. Very handsome wrinkled foliage. Try this as a back-ground shrub for the perennial border. **Each 75c; 3 for \$2.00.**

F. J. GROOTENDORST—Red. A red flowering form of the variety above. **Each 75c; 3 for \$2.00.**

PINK MOSS—The old-fashioned variety with pale pink flowers and mossy buds. **Each 75c; 3 for \$2.00.**

HUGONIS—(Rosa Hugonis) Of recent introduction from Western China. A very hardy shrub type rose to a height of six feet or more. Single clear yellow flowers about 2 inches across cover the plant in the spring. Very ornamental and of rapid growth, requiring but little attention. **Each \$1.00; 3 for \$2.75.**

TREE ROSES

Plant them along walks and driveways or use them in the beds with the bush roses. They are very effective and always admired. Tree roses produce superior blooms and are excellent for exhibition purposes.

Our trees are all grafted on 4-5 foot standards and will be matched for size. **Each \$2.50; 4 for \$9.00.** Shipped only by express or freight, not prepaid.

See main list for more detailed description of varieties.

AUTUMN—Burnt orange.
ANGELE PERNET—Orange to reddish-apricot.
CHAS. P. KILHAM—Rosy orange.
ETOILE DE HOLLAND—Deep red.
FRAU K. DRUSCHKI—Pure white.
LUCIE MARIE—Yellow.
LOS ANGELES—Shrimp pink.
MARGARET McGREDY—Oriental red.
MAD. JULES BOUCHE—Pure white.
MAD. EDUARD HERRIOT—Coppery red.
PRESIDENT HOOVER—Red, orange and copper.
SUNKIST—Coppery yellow.
SOUV. DE CLAUDIUS PERNET—Yellow.

TREE ROSE

ROCK GARDEN ROSES

ROSA CHINESIS LAWRENCEANA

A very dwarf class of roses seldom growing more than twelve inches in height. They are excellent subjects for the rock garden, displaying an abundance of tiny roses throughout the summer.

ROULETTI — A profusion of double pink flowers. Small dense leaves. Plant in poor soil without fertilizer. **Each 50c; 10 for \$4.50.**

TOM THUMB—Plant Pat. No. 169. (1935) This tiny little rose is a real prize. It is similar to Rouletti, of which it is a hybrid, except that the flowers are a clear bright crimson. Will grow to about 6 to 8 inches in height. A fine rock garden plant. Must be in soil that is not rich and well drained. **Each 75c; 2 for \$1.25.**

PLEASE READ BEFORE ORDERING

Shipments Made November 1st to April 1st—Plants are shipped when ripened or dormant enough to ship before November 1st. Most of the patent varieties are not released to us before December 15th. It is not practical or advisable to ship later than April 1st.

Those living in regions with late spring should place their order early. Plants will be reserved and held dormant as long as possible and then shipped to be held longer in cooler climate if necessary before planting.

Genuineness and Guarantee—The greatest care and precaution is exercised to keep all varieties true to name and we do not substitute unless authorized to do so, and then under true labels only. Any plants proving otherwise will be replaced free of charge; but it is mutually agreed and understood that we will not be held liable for any greater amount than the purchase price of the plants involved.

Plants should be examined immediately upon arrival and if not in good condition they should be returned immediately. If accepted they should be set in a pail or tub of water over night (not longer), after which they may be planted out or just heeled in until ready to plant. Any plants failing to grow will be replaced at one-half purchase price.

Special Discount for large orders. A discount of 10% is offered on orders of fifty roses or more. 15% discount on orders of 100 or more. Patent varieties excepted. Many will be able to take advantage of this saving by ordering with friends.

All prices subject to change without notice.

No C.O.D. shipments. Please send cash, check or post office money order.

IT IS BEST to name second choice roses, when ordering. We do not substitute unless authorized to do so, and then under true name only. Some varieties are sure to sell out before others, and by naming second choice your planting plan has better chance of working out on schedule.

PLANTING INSTRUCTIONS

Few plants respond so readily to good care and culture as the rose. But few will survive under more adverse conditions. Or, though your bushes may grow, do not expect best results unless you would give them thought and care throughout the year. Our plants are packed well in damp moss to arrive in perfect condition for immediate planting. If not planted immediately the roots should be kept moist and stored in a cool place until planted.

Select a place that has not less than one-half the day's sun, more or full sun is better. Dig the soil to a good depth to know that the plant will have good root room and that a layer of hard pan or tight earth does not exist just below the plant to hold water and injure the plants during the winter months. Enrich the soil with well rotted cow manure and sand if necessary to create a friable condition. Some clay in the soil is desirable for its mineral content, provided enough sand or humus are added to make the soil workable.

Dig large holes, spaced at least 18-24 inches apart. Spread out the roots and fill in with loose earth. Run water in the holes while filling in to bring the soil in better and closer contact to the roots. Cut back tops to about 6 or 8 inches. Do not plant too deep. Plant only to the depth the plant originally grew.

During the growing season the plants should be fed with a good complete commercial fertilizer worked into the top soil around the plants. Small quantities monthly are best. First application for new plants should not be used until plants are in full and strong leaf and then only in very small amounts.

Spray the plants regularly. Dry sulphur, containing about one-fifth arsenate of lead, to keep down the mildew. A nicotine or pyrethrum spray for aphids on the young shoots. Or if you prefer an all-around spray, we have found Triogen to give excellent results where it is used regularly about every ten days.

Space does not permit more detailed instructions and only a general outline is intended. Your interest and good judgment are after all the most important factors and will pay you a thousand fold for your every effort.
